Subject: SUBMITTAL OF FINAL HUMAN HEALTH RISK ASSESSMENT TECHNICAL
MEMORANDUMS TO THE ADMINISTRATIVE RECORD

This letter transmits the Final versions of each of the Human Health Risk Assessment (HHRA) Technical Memorandums (TMs) to the Administrative Record. The Inter-Agency Agreement (1991) requires that these TMs be submitted to the regulatory agencies for review and approval (see sections VII.D.1.b and VII.1.c.). Each of these documents have been submitted as a Final, but comments or approvals have never been returned to the Department of Energy (DOE). An exception is TM No. 5, Chemicals of Concern, which was approved as a Draft Final.

Attached is the Final TM No. 2, Exposure Assessment which was used in the preparation of the HHRA. Also attached is TM No. 3, Model Description dated December, 1994, which was originally submitted as a Final in January of 1994. However, because changes occurred to the technical content after the Final submittal, a new Final was generated in December of 1994.
